SUMMARY

I am a Full Stack Developer with experience designing and building scalable web and application solutions. I develop end-to-end applications, REST API integrations, database and cloud systems, and AI-powered tools that support real business operations. I also work on systems for manufacturing and business operations, helping improve work processes, reduce manual tasks, and increase overall productivity. In addition, I work with different teams to understand requirements and deliver practical solutions that support business growth and digital transformation.

WORK EXPERIENCE

Panasonic Solutions (Thailand) Co., Ltd. — Full Stack Developer **Nov 2024 - Present**

- Design, develop, and maintain web applications and enterprise systems for business operations.
- Build frontend and backend features using modern frameworks across the stack.
- Design and integrate REST APIs and connect applications with databases and external services.
- Optimise database structures and system performance for scalability and maintainability.
- Build and run cloud-based deployments and workflow automation.
- Collaborate with cross-functional teams to analyse requirements and deliver business solutions.
- Participate in system design, troubleshooting, testing, and deployment processes.

AI Technovation Co., Ltd. (Co-op & Internship) — Mobile Application Developer **Apr 2023 - Oct 2023**

- Designed UX / UI for the application in Figma, then built it in Flutter.
- Implemented state management with the BLoC library across multi-step flows.
- Used Firebase for authentication and Crashlytics, with Postman / Swagger for API testing.
- Managed source control with Git / GitHub / SourceTree, and team tasks with Trello.

EDUCATION

B.Eng. — Electronics and Computer Systems Engineering **Jun 2020 - Mar 2024**

Silpakorn University

- GPA: 3.08
- Received First Runner-up Award in the System Development for Telemedicine Application in the Cooperative Education Project.

Science — Mathematics **2017 - 2020**

Sakolraj Wittayanukul School

- GPA: 3.20
- Started learning programming for the first time in the classroom, including C, C++ and Python.

ADDITIONAL INFORMATION

- **Technical Skills:** ASP.NET MVC, Next.js, Flutter, FastAPI, PostgreSQL, SQL Server, Docker, AzureDevOps, AWS Lambda, AWS S3, Power Apps, Power Automate, LLM APIs, Prompt Engineering.
- **Languages:** Thai, English.
- **Awards/Certifications:** Received the runner-up award 1 in the cooperative project competition, Developing an Android Mobile Application with Flutter for beginners, IoT system development using ESP32 MQTT and Node-RED and Python Programming
